KEERTHI MOHAN

Senior Frontend Lead | React.js, Next.js, Web Vitals & Web Accessibility

keerthidarshan20@gmail.com +966590828759 Riyadh, Saudi Arabia

Immediate Joiner | Iqama Holder linkedin.com/in/keerthi-mohan-uideveloper/

Summary

Senior Frontend Engineer & Tech Lead with **10 years of experience** architecting high-performance web applications using **React.js, Next.js, TypeScript, and modern JavaScript (ES2023+)**. Proven track record of leading **Agile/Scrum teams**, driving **CI/CD pipelines**, optimizing **Core Web Vitals (TTFB, FCP, TTI)**, and enforcing **WCAG accessibility and security best practices**. Adept at cross-functional collaboration with Product, Backend, QA, and Marketing teams to deliver robust software solutions.

Experience

Senior Software Engineer 2, *Contentstack* 10/2022 – 10/2026

- Led frontend architecture and Agile/Scrum engineering workflows using **Next.js and TypeScript**, managing sprint planning, daily stand-ups, grooming, and retrospectives.
- Optimized **Core Web Vitals metrics (TTFB, FCP, TTI)**, maintaining Lighthouse performance scores above 90+ and significantly enhancing user experience.
- Partnered with Backend, QA, and Product teams to design RESTful integrations, define comprehensive test cases, and establish **CI/CD automated testing and deployment workflows**.
- Enforced **OOP concepts, SOLID principles, and web security standards** during peer code reviews, ensuring robust codebase health, architecture, and minimal production downtime.
- Mentored junior and mid-level engineers, leading Frontend Chapter initiatives and establishing best practices for component modularity and WCAG accessibility.

Senior Software Engineer, *Y Media Labs* 11/2018 – 10/2022

Client: Lecet and Clover Inc

- Championed Agile practices (Pair Programming, TDD, CI/CD) to develop scalable React.js web applications for high-profile clients like Clover Inc. and Lecet.
- Collaborated closely with QA engineers to support automated/manual testing processes and establish robust test coverage across release cycles.
- Authored thorough technical documentation for architectural designs, developer onboarding, and ongoing codebase maintenance.

Associate Technology, *Publicis Sapient* 06/2016 – 10/2018

Client: Bed Bath & Beyond

- Worked on migration of legacy jQuery-based application to React.js architecture.
- Developed reusable frontend components using React.js, JSP, jQuery, and SCSS.
- Wrote unit test cases ensuring over 80% code coverage.
- Collaborated within Agile teams to deliver scalable and maintainable solutions.

Technical Skills

Frontend Frameworks & Architecture
React.js, Next.js 15 (Server Components, Streaming, SSG), Modern JavaScript (ES2023+), TypeScript, HTML5, CSS3/SCSS, OOP & SOLID Principles.

Analytics & CMS
Google Analytics, Google Tag Manager, Contentstack, Contentful

Testing & Quality Assurance
Test-Driven Development (TDD), Jest, Playwright (E2E), Manual & Automated Test Case Alignment.

State Management
Redux, React Context API, REST APIs, GraphQL

DevOps, Tools & Methodology
Agile/Scrum (Sprint Planning, Grooming, Retrospectives), CI/CD Automation (GitHub Actions/Vercel), Git, JIRA, Web Security & Debugging, WCAG Accessibility.

Performance & Web Vitals
Core Web Vitals (TTFB, TTI, FCP), Lighthouse, PageSpeed Insights, GTMetrix, SEO & AI Crawlability.

Education

Bachelor's Degree, Information Science and Engineering, 2016
PES Institute Of Technology Bengaluru, Karnataka, India
